

Table F Notes:

Sample Phases

- Phase III (October 2010) was the initial sampling of MW02 after well installation
- Phase IV was sampling conducted in April 2011
- Phase V was sampling conducted in April 2012.
  - EPAMW02-0412-1 was the sample collected under no purge, with full hydrostatic head conditions
  - EPAMW02-0412-2 was the split sample collected after one borehole volume had been purged from MW02. This sample was split between EPA and USCG (analyzed by Test America).

Data Qualifiers

Table B30 (attached) contains the data qualifiers.

D flags indicate samples requiring dilution prior to analysis, nothing else implied. Region 8 has requested that the Dilution factors be included in the data.

MBAS is methylene blue active substances
